

The **VIATEC GmbH** offers equipment (sensors, loggers and accessories) and know-how for monitoring of buildings.

The management (Bernd Brenner and Steffen Pönitz) is working since more than 15 years in customer service.

We offer the following services:

- engineering to design measurement systems
- mobile measuring services and evaluation
- supplier independent delivery of sensors and devices
- installation services for all components
- maintenance works for all current market systems
- data management and software development
- operator training
